-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

1. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because the wording on some of the figures is difficult to read. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Argument Concerning the For Sale Issue

1. The arguments concerning the "for sale" issue have been reviewed and found persuasive. The rejection is being withdrawn.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1 – 30 are rejected under 35 U.S.C. 102(e) as being anticipated by Sanada (US 5,985,357).

Sanada has a spin coating method and apparatus in which the timing of the substrate operations are controlled. The spin coating apparatus is shown in fig. 2. Figs. 5, 8, 9

and 11 show the timing charts for the apparatus and Fig. 6 and 7 show the flow charts for the apparatus. The method is such that the actual time of conditions and events are responded to based on sensor data and timer and clock. Based on sensor data the sequence of events may be modified, thus the sequence or series of operations may be modified by a signal to interrupt the operation and carry out a command.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Nguyen (US 2001/0012971) has a clean method and system comprising multiple task modules 200 – 208 that serve as interrupt to the processing modules. See paragraphs [0044 – 0049] and Fig. 2.
